

Álvaro Ortega Chamorro

Álvaro Ortega Chamorro, graduated in computer science by University of Granada in Spain, has worked in developments and researches related to IT security. Nowadays he is a member of the evaluation team of Epoche and Espri S.L., a private IT security evaluation and FIPS conformance testing facility based in Madrid.

Álvaro is a senior CC evaluator and FIPS 140-2 tester in Epoche and Espri, his main involvement with the security evaluations comes from participating as senior pen-tester, reverse engineer and exploit writer in the CC security evaluations, and helping in the development of the lab AVA_VAN methodology. He has been involved in more than 5 security evaluations with several assurance levels from EAL1 to EAL4 AVA_VAN.5, and has been especially involved in the training of the new evaluators. He also holds the senior tester category?participating in the conformance testing process of cryptographic modules under FIPS validation.
