

Erin Connor

Erin Connor joined EWA-Canada, a company that specializes in IT Security Engineering Services, in 1994. Since 2000, Erin has been working on evaluations of a wide variety of products providing security and other services in network and stand-alone environments. He was also the only representative of an evaluation lab in the Biometric Evaluation Methodology Working Group, which developed a proposed methodology for the evaluation of biometric technologies under the Common Criteria.

Erin is a Director at EWA-Canada with responsibility for EWA-Canada's Information Technology Security Evaluation & Testing Facility, which includes a Common Criteria Test Lab, and a Cryptographic & Security Test Lab that carries out validation testing of cryptographic products to FIPS 140-2, and configuration assessment and auditing products to Security Content Automation Protocol program requirements.

Erin previously enjoyed a successful 20-year career as an engineer in the Canadian Navy.
