

Françoise Forge

Engineer in electronics with a Master in Information Technology and Artificial Intelligence, Françoise Forge started her career in the semiconductor industry with ST Microelectronics before moving to IT Software Quality & Security management. As a consultant, contributed to the first Common Criteria evaluation of a Security IC at EAL4 in 1998 and then supported major smart card manufacturers in the elaboration and completion of Common Criteria certification at high level, before joining Gemplus (now Gemalto), to manage evaluation project mainly for banking cards and Electronic signature cards.

Being involved in several CC workshops for Eurosmart and Global Platform organization, Françoise is now chairing the Eurosmart Product and System Security Working Group (PSSWG) and the Information Security Certification Initiative (ISCI) Working Group 1 which is dedicated to CC methodology application to smart cards.
