

José Francisco Ruiz Gualda

José Francisco Ruiz Gualda, graduated in computer science, has experience in areas related to security products development, IT products security evaluation under CC standard and FIPS 140-2 conformance testing of cryptographic modules.

José is a senior CC evaluator and FIPS 140-2 tester in Epoche and Espri, his main involvement with the security evaluations comes from participating as senior pen-tester, reverse engineer and exploit writer in CC security evaluations, and helping in the development of the lab AVA_VAN methodology. He has been involved in more than 10 security evaluations with several assurance levels from EAL1 to EAL4 AVA_VAN.5, and has been especially involved in the training of the new evaluators. He also holds the senior tester category? participating in the conformance testing process of cryptographic modules under FIPS validation.
