

Sunil J. Trivedi

Sunil J. Trivedi is a Lead Information Security (INFOSEC) Engineer/Scientist with The MITRE Corporation at the Bedford Massachusetts USA campus. Sunil currently supports United States Air Force projects involving Public Key Infrastructure (PKI). At MITRE, he is extensively involved in exploring new PKI-related technologies to see how and where the new technology based products can be integrated within the current Air Force PKI architecture. Acting as a lead validator, he is also a member of the NIAP CCEVS Validation team and is exposed to various product security evaluations. Mr. Trivedi has almost twelve years of experience in the PKI related field and five years of NIAP Validator experience. Prior to joining MITRE, Mr. Trivedi worked at GTE Government Systems and GTE CyberTrust in Needham, Massachusetts for over 22 years. At GTE, he was exposed to various secure DoD communication systems.
